

QUALITY POLICY

The Company's mission is to design, manufacture and market high-precision Laser Measurement Systems characterised by very high reliability, durability and ease of use. These are systems for non-contact diameter measurement, to control various types of products, used by customers to improve process efficiency, reduce waste and to ensure the product's dimensional conformity.

Aeroel has always adhered to a policy that sees in the quality of products and organisational efficiency those distinctive elements that, by improving the level of satisfaction of our customers, can increase competitiveness and ensure the constant development of the Company.

Belonging to Marposs group represents an opportunity for Aeroel to grow and improve, to share the Quality Policy, while at the same time maintaining its mission and commitments.

Quality is the point of reference for all our activities: our daily work is informed by professional ethics and fairness. This choice binds us in the commitment **to meet the customer's requirements** through the compliance of the Products and Services provided in terms of quality, reliability, punctuality, flexibility and to **continuously** and systematically **improve** the effectiveness of the quality management system.

In order to achieve and maintain the set objectives over time and support a company organisation oriented towards continuous improvement, Aeroel confirms its willingness to maintain the Quality Management System Certification based on ISO 9001 standards. This system has been developed to ensure an effective and efficient use of resources, focusing on the expectations of customers and other stakeholders.

We can confirm the following commitments for Aeroel:

- 1) guarantee the quality of the product and of customer service;
- 2) establish long-lasting relationships with customers based on mutual collaboration;
- 3) introduce innovative technological solutions;
- 4) design and manufacture easy-to-use tools;
- 5) build instruments free of functional defects;
- 6) have trained and involved personnel.

Everyone in the Company is committed to achieving the continuous improvement of the management system and to maintaining specific objectives which, as a whole, play an essential role in furthering the global Quality strategy. In this context, the QMS (Quality Management System) is considered the fundamental means to guide the improvement of the undertaking's performance and is a consolidated custom for the entire company.

The contribution of suppliers to the achievement of the objectives is decisive; therefore, it is necessary to maintain and perfect the relationship of absolute collaboration and full understanding of mutual problems.

The Management will continue to involve internal staff so that everyone recognises the importance of their role and contribution to the achievement of the company's objectives, aiming at the enhancement of human resources, favouring both the professional growth of each one and work in a serene, organised and safe environment, and ensuring compliance with the Laws and Regulations in force.
